

AnaEE-ERIC call 2025

Experimental Ecology Access Call

AnaEE-ERIC Launches First Call for Proposals: Member Institutions Invited to Lead European Ecosystem Research Collaboration

Paris, July 4, 2025

AnaEE-ERIC announces its inaugural call for proposals, inviting researchers from member institutions and beyond to access Europe's most comprehensive network of experimental ecology facilities. The call runs from June 2nd through October 3rd, 2025.

This first call offers researchers from some of Europe's most distinguished research institutions unprecedented access to 60+ highly instrumented installations across all continental ecosystem types – from tropical and mountain environments to wetlands, forests, and agro-ecosystems.

COLLABORATIVE IMPACT

The call encourages inter- and transdisciplinary applications, fostering collaboration between member institutions to address critical environmental challenges including climate change adaptation, biodiversity loss, and sustainable land management. AnaEE-ERIC's facilities enable controlled ecosystem studies that provide essential data for evidence-based environmental policy.

"This first call represents an invitation to shape the future of European ecosystem research through collaborative breakthroughs. Science has a critical role in addressing humanity's challenges by bridging knowledge gaps, proposing viable solutions, and engaging with citizens, society, and economic actors. Our experimental approach allows us to predict functional changes, anticipate shifts in ecosystem services, and test solutions that enhance resilience in the face of climate change and extreme events."

**Michel Boër, Director General
AnaEE-ERIC**

HOW TO APPLY

Researchers should explore the catalogue of services at anaee.eu, contact facility managers to discuss feasibility, and submit proposals via the ISIA platform. An independent committee will evaluate proposals based on scientific merit.

Application Deadline: October 3rd, 2025 at 23:59 CEST

For more information: anaee.eu or access@anaee.eu

Procedure: proposals should be submitted [via the ISIA platform](#).

Further assistance and inquiries: access@anaee.eu

General inquiries on AnaEE-ERIC: contact@anaee.eu

Users are strongly advised to contact the facility managers while writing their proposal, to ensure feasibility.
